FACE + BODY AESTHETIC SOLUTIONS by CUTERA

"Canada is a key market for Cutera and our full aesthetics technology product line," said Cutera's Chief Executive Officer, David Mowry. "truSculpt iD's global popularity among providers and patients remains strong. This additional approval from Health Canada reinforces the acknowledgement of the clinical effectiveness for truSculpt iD to permanently eliminate fat."

Research shows that noninvasive body sculpting is the #1 non-surgical fat reduction procedure, with a 14.5% increase year-over-year in body shaping

The Company launched truSculpt iD in the US and Canada in 2018.

About truSculpt iD

truSculpt is a non-surgical body sculpting treatment that uses monopolar radiofrequency (RF) technology. It is clinically proven to get rid of stubborn fat cells permanently by an average of 24%³, even in areas that are resistant to diet and exercise. truSculpt iD is clinically proven to eliminate fat in as little as one 15-minute hands-free treatment, completely personalized to an individual's needs.
