"With a long history of engineering and innovation, Cutera continues to pioneer new, safe, and effective treatments for medical and aesthetic providers and their patients," said Michael Karavitis, Ph.D, Executive Vice President, Chief Technology Officer, Cutera. "We are thrilled to have presented such strong clinical data at one of the premier scientific meetings in the field of medical lasers and energy-based technologies."

AviClear received FDA clearance in March 2022 following extensive clinical trials. Select physicians began treating patients in April as part of Cutera's limited commercial release.

National availability for AviClear will be offered throughout the United States in 2022. Interested providers are encouraged to visit www.aviclear.com to sign up for updates and product alerts.
