#### Cutera<sup>®</sup> Reports First Quarter 2008 Results

BRISBANE, Calif., May 6, 2008 — Cutera, Inc. (NASDAQ: <u>CUTR</u>), a leading provider of laser and other light-based aesthetic systems for practitioners worldwide, today reported financial results for the first quarter ended March 31, 2008.

First quarter 2008 revenue was \$21.6 million, compared to \$23.3 million in the same period last year. Net loss for the first quarter of 2008 was \$542,000, or \$0.04 per diluted share, compared to net income of \$1.8 million, or \$0.12 per diluted share, in the first quarter of 2007.

"We are pleased with the continuing improvement in our international revenue, which grew 25% when comparing the first quarter of 2008 to the first quarter of 2007, and with the overall increase in Upgrade, Service, and Titan refill revenue. However, continued low performance levels from our North American business, caused in part by a slower domestic industry growth rate, resulted in a decline in US revenue for the quarter," said Kevin Connors, President and Chief Executive Officer.

"U.S. revenue declined 22% in the first quarter of 2008 compared to the first quarter of 2007. We believe we have a seasoned sales management team and a stable workforce, however, it is taking longer than expected to achieve our targeted performance levels. While we believe consumer demand for elective procedures remains healthy, this soft economic market is causing physicians to delay their decisions to make significant capital equipment purchases. We are closely monitoring our performance in this challenging market and will continue our focus on improving our results."

"International revenue increased 25% when comparing the first quarter of 2008 to the first quarter of 2007. We are experiencing strength in many of our overseas markets, particularly in Japan, Australia, and many emerging global markets. We believe the significant investments we have made during the past few years have us positioned for continued growth in the international markets."

"We are excited about the increasing number of positive clinical results and patient reports with our Pearl product, and believe we will experience increased market penetration. Additionally, the responses surrounding the recent preview of our fractional ablative technology have been very favorable. This new device, designed to improve wrinkles by targeting the deep dermal layer, would enable us to compete in the expanding fractional ablative market and is expected to contribute to our revenue in the second half of 2008. Historically, new clinical applications have been a catalyst for significant revenue growth in the quarters following their introduction."

Mr. Connors concluded, "Cutera remains focused on capturing a greater position in what we see is a growing worldwide market for aesthetic laser and light-based equipment. We remain confident in the long term prospects of this market, and are looking forward to our planned new product launch later this year."
