

Supplier Environmental Policy

We recognize, as a company, that we have a responsibility to protect the environment on behalf of our shareholders, customers, staff and the communities in which we operate.

We also recognize that the process of continual environmental improvement depends on the involvement and commitment of all our business partners.

Our Environmental Policy reflects Cutera's commitment to responsible management of the environmental effects arising from its activities, through:

- optimizing the use of energy
- ensuring efficient use of materials
- encouraging re-use and recycling
- incorporating the principle of sustainable development.

We expect our suppliers, therefore, to be an active part of this policy by encouraging the following practices:

- Suppliers have a policy statement covering relevant environmental and sustainability issues.
- Suppliers be aware of the environmental impacts of the products and services they provide.
- Suppliers have a robust system that ensures they are aware of and comply with all relevant legislation so that all products or services supplied to Cutera at least meet or exceed these requirements.
- Products and services supplied to Cutera take into account of the principles of sustainable development in their design, production, use and end-of-life disposal. Specifically, we strongly encourage that Suppliers:
 - use the optimum amount of raw material
 - safeguard biodiversity
 - use energy efficiently
 - minimize the impacts of use and disposal
