QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2009

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period _____ to _____.

Commission file number: 000-50644

CUTERA

Cutera, Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

77-0492262
(I.R.S. employer
identification no.)

3240 Bayshore Blvd., Brisbane, California 94005
(Address of principal executive offices)

(415) 657-5500
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.): Yes No

The number of shares of Registrant's common stock issued and outstanding as of April 30, 2009 was 13,289,018.

CUTERA, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies

Description of Operations and Principles of Consolidation.

Cutera, Inc. (Cutera or the Company) is a global provider of laser and other light-based aesthetic systems for practitioners worldwide. The Company designs, develops, manufactures, and markets the CoolGlide, Xeo and Solera product platforms for use by physicians and other qualified practitioners to allow its customers to offer safe and effective aesthetic treatments to their customers.

Headquartered in Brisbane, California, the Company has wholly-owned subsidiaries in Australia, Canada, France, Japan, Spain, Switzerland and United Kingdom that market, sell and service its products outside of the United States. The Condensed Consolidated Financial Statements include the accounts of the Company and its subsidiaries. All inter-company transactions and balances have been eliminated.

Unaudited Interim Financial Information

The financial information filed is unaudited. The Condensed Consolidated Financial Statements included in this report reflect all adjustments (consisting only of normal recurring adjustments) that the Company considers necessary for the fair statement of the results of operations for the interim periods covered and of the financial condition of the Company at the date of the interim balance sheet. The December 31, 2008 Condensed Consolidated Balance Sheet was derived from audited financial statements, but does not include all disclosures required by generally accepted accounting principles in the United States of America (GAAP). The results for interim periods are not necessarily indicative of the results for the entire year or any other interim period. The Condensed Consolidated Financial Statements should be read in conjunction with the Company's financial statements and the notes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2008 filed with the Securities and Exchange Commission, or SEC, on March 16, 2009.

Use of Estimates

The preparation of interim Condensed Consolidated Financial Statements in conformity with GAAP requires the Company's management to make estimates and assumptions that affect the amounts reported and disclosed in the condensed consolidated financial statements and the accompanying notes. Actual results could differ materially from those estimates. On an ongoing basis, the Company evaluates their estimates, including those related to warranty obligation, sales commission, accounts receivable and sales allowances, fair values of long-term investments, fair values of acquired intangible assets, useful lives of intangible assets and property and equipment, fair values of options to purchase the Company's common stock, recoverability of deferred tax assets, and effective income tax rates, among others. Management bases their estimates on historical experience and on various other assumptions that are believed to be reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities.

Significant Accounting Policies

The Company's significant accounting policies are disclosed in the Company's annual report on Form 10-K for the year ended December 31, 2008 filed with the SEC on March 16, 2009, and have not changed significantly as of March 31, 2009.

Recent Accounting Pronouncements

In April 2009, the FASB issued Staff Position No. 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FSP FAS 157-4), which provides additional guidance for estimating fair value in accordance with Statement of Financial Accounting Standard (SFAS) No. 157. FSP FAS 157-4 is effective for the Company's quarter ending June 30, 2009 and could affect its accounting for its investment in student loan-related auction rate securities. The Company is currently evaluating the requirements of this pronouncement and has not determined the impact, if any, that adoption will have on its Condensed Consolidated Financial Statements.

In April 2009, the FASB issued Staff Position No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* (FSP FAS 115-2), which provides new guidance on the recognition of other-than-temporary impairments of investments in debt securities and provides new presentation and disclosure requirements for other-than-temporary impairments of investments in debt and equity securities. FSP FAS 115-2 is effective for the Company's quarter ending June 30, 2009. The Company is currently evaluating the requirements of this pronouncement and has not determined the impact, if any, that adoption will have on its Condensed Consolidated Financial Statements.

In April 2009, the FASB issued Staff Position No. FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments* (FSP FAS 107-1). FSP FAS 107-1 amends SFAS No. 107, *Disclosures about Fair Value of Financial Instruments* to require disclosures about fair value of financial instruments in interim reporting periods. Such disclosures were previously required only in annual financial statements. FSP FAS 107-1 is effective for the Company's quarter ending June 30, 2009. FSP FAS 107-1 applies only to financial statement disclosures, the adoption will not have a material effect on the Company's Condensed Consolidated Financial Statements.

Note 2. Balance Sheet Details

Cash and Cash Equivalents, Marketable Investments and Long-Term Investments:

The Company considers all highly liquid investments, with an original maturity of three months or less at the time of purchase, to be cash equivalents. Investments in debt securities are accounted for as "available-for-sale" securities, carried at fair value with unrealized gains and losses reported in other comprehensive income, held for use in current operations and classified in current assets as "Marketable investments" and in long term assets as "Long-term investments."

Table of Contents

The following is a summary of cash and cash equivalents, marketable investments and long-term investments (in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Market Value
March 31, 2009				
Cash and cash equivalents	\$ 35,793	\$ —	\$ —	\$ 35,793
Marketable investments (municipal securities)	57,562	569	—	58,131
Long-term investments (auction rate securities)	9,627	—	(164)	9,463
	<u>\$102,982</u>	<u>\$ 569</u>	<u>\$ (164)</u>	<u>\$103,387</u>
December 31, 2008				
Cash and cash equivalents	\$ 36,540	\$ —	\$ —	\$ 36,540
Marketable investments:				
Municipal securities	59,837	566	—	60,403
Auction rate securities	219	31	—	250
Total marketable investments	60,056	597	—	60,653
Long-term investments in auction rate securities	9,627	—	—	9,627
	<u>\$106,223</u>	<u>\$ 597</u>	<u>\$ —</u>	<u>\$106,820</u>

Fair Value of Financial Instruments:

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

- Level 1: Quoted prices (unadjusted) in active markets that are accessible at the measurement date for assets or liabilities. The fair value hierarchy gives the highest priority to Level 1 inputs.
- Level 2: Directly or indirectly observable inputs as of the reporting date through correlation with market data, including quoted prices for similar assets and liabilities in active markets and quoted prices in markets that are not active. Level 2 also includes assets and liabilities that are valued using models or other pricing methodologies that do not require significant judgment since the input assumptions used in the models, such as interest rates and volatility factors, are corroborated by readily observable data from actively quoted markets for substantially the full term of the financial instrument.
- Level 3: Unobservable inputs that are supported by little or no market activity and reflect the use of significant management judgment. These values are generally determined using pricing models for which the assumptions utilize management's estimates of market participant assumptions.

In determining fair value, the Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible as well as considers counterparty credit risk in its assessment of fair value.

As of March 31, 2009, financial assets measured and recognized at fair value on a recurring basis and classified under the appropriate level of the fair value hierarchy as described above was as follows (in thousands):

	Level 1	Level 2	Level 3	Total
Cash equivalents	\$34,014	\$ —	\$ —	\$ 34,014
Short term marketable investments:				
Available-for-sale securities	—	58,131	—	58,131
Long-term investments:				
Available-for-sale ARS	—	—	9,463	9,463
Total assets at fair value	<u>\$34,014</u>	<u>\$58,131</u>	<u>\$9,463</u>	<u>\$101,608</u>

The Company's Level 1 financial assets are money market funds and highly liquid debt instruments of U.S. federal and municipal governments and their agencies with stated maturities of three months or less from the date of purchase, whose fair values are based on quoted market prices. The Company's Level 2 financial assets are highly liquid debt instruments of U.S. federal and municipal governments and their agencies with stated maturities of greater than three months, whose fair values are obtained from readily-available pricing sources for the identical underlying security that may, or may not, be actively traded.

At March 31, 2009, observable market information was not available to determine the fair value of the Company's ARS investments. Therefore, the fair value is based on broker-provided valuation models that relied on Level 3 inputs including those that are based on expected cash flow streams and collateral values, assessments of counterparty credit quality, default risk underlying the security, market discount rates and overall capital market liquidity. The valuation of the Company's ARS investment portfolio is subject to uncertainties that are difficult to predict. Factors that may impact the valuations in the future include changes to credit ratings of the securities, as well as to the underlying assets supporting those securities, rates of default of the underlying assets, underlying collateral value, discount rates, counterparty risk and ongoing strength and quality of market credit and liquidity. These financial instruments are classified within Level 3 of the fair value hierarchy.

[Table of Contents](#)

The table presented below summarizes the change in carrying value associated with Level 3 financial assets for the three months ended March 31, 2009.

	<u>March 31, 2009</u>
Balance at December 31, 2008	\$ 9,627
Transfers into Level 3	—
Total gains or losses (realized or unrealized)	—
Included in earnings (other-than-temporary impairment of non-current ARS investments)	—
Included in other comprehensive loss	(164)
Balance at March 31, 2009	<u>\$ 9,463</u>

Other Current Assets and Prepaid Expenses:

Other current assets consist of the following (in thousands):

	<u>March 31, 2009</u>	<u>December 31, 2008</u>
Tax receivable	\$ 1,352	\$ 235
Deposits	625	824
Prepaid expense	1,020	712
	<u>\$ 2,997</u>	<u>\$ 1,771</u>

Inventories:

Inventories consist of the following (in thousands):

	<u>March 31, 2009</u>	<u>December 31, 2008</u>
Raw materials	\$ 5,327	\$ 5,071
Finished goods	4,519	4,856
	<u>\$ 9,846</u>	<u>\$ 9,927</u>

Intangible Assets:

Intangible assets were principally comprised of a patent sublicense acquired from Palomar Medical Technologies in 2006, a patent sublicense acquired in 2002 and other intangible assets acquired in 2007. The components of intangible assets at March 31, 2009 and December 31, 2008 were as follows (in thousands):

	<u>March 31, 2009</u>		
	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization Amount</u>	<u>Net Carrying Amount</u>
Patent sublicense	\$ 1,218	\$ 414	\$ 804
Technology sublicense	538	369	169
Other intangibles	20	18	2
Total	<u>\$ 1,776</u>	<u>\$ 801</u>	<u>\$ 975</u>
	<u>December 31, 2008</u>		
	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization Amount</u>	<u>Net Carrying Amount</u>
Patent sublicense	\$ 1,218	\$ 379	\$ 839
Technology sublicense	538	356	182
Other intangibles	20	16	4
Total	<u>\$ 1,776</u>	<u>\$ 751</u>	<u>\$ 1,025</u>

For the three months ended March 31, 2009 and 2008, amortization expense for intangible assets was \$50,000.

Based on intangible assets recorded at March 31, 2009, and assuming no subsequent additions to, or impairment of the underlying assets, the remaining estimated annual amortization expense is expected to be as follows (in thousands):

<u>Fiscal Year Ending December 31:</u>	
2009 remainder	\$ 146
2010	192
2011	192
2012	158
2013	138
Thereafter	149
Total	<u>\$ 975</u>

[Table of Contents](#)**Note 3. Stock-based Compensation Expense**

Total pre-tax stock-based compensation expense by department recognized during the three months ended March 31, 2009 and 2008 was as follows (in thousands):

	Three Months Ended March 31,	
	2009	2008
Cost of sales	\$ 211	\$ 224
Sales and marketing	291	440
Research and development	182	154
General and administrative	361	512
Total stock-based compensation expense	<u>\$ 1,045</u>	<u>\$ 1,330</u>

Note 4. Net Loss Per Share

Basic net loss per share is calculated by dividing net loss by the weighted-average number of common shares outstanding during the year. Diluted net loss per common share is the same as basic net loss per common share, as the effect of the potential common stock equivalents is anti-dilutive and as such is excluded from the calculations of the diluted net loss per share.

The following table sets forth the computation of basic and diluted net loss and the weighted average number of shares used in computing basic and diluted net loss per share (in thousands):

	Three Months Ended March 31,	
	2009	2008
Numerator:		
Net loss – Basic and Diluted	<u>\$ (1,828)</u>	<u>\$ (542)</u>
Denominator:		
Weighted-average number of common shares outstanding used in computing basic and diluted net loss per share	<u>13,120</u>	<u>12,740</u>

Anti-dilutive securities

The following number of weighted shares outstanding, prior to the application of the treasury stock method, were excluded from the computation of diluted net loss per common share for the periods presented because including them would have had an anti-dilutive effect (in thousands):

	Three Months Ended March 31,	
	2009	2008
Options to purchase common stock	2,747	2,484
Restricted stock units	12	27
Employee stock purchase plan shares	45	38
Total	<u>2,804</u>	<u>2,549</u>

Note 5. Service Contract Revenue

Service contract revenue is recognized on a straight-line basis over the period of the applicable service contract. The deferred service contract revenue balances as of March 31, 2009 and March 31, 2008, were as follows (in thousands):

	March 31,	
	2009	2008
Balance at December 31, 2008 and 2007	\$11,665	\$10,564
Add: Payments received	1,489	2,721
Less: Revenue recognized	(2,557)	(1,933)
Balance at March 31, 2009 and 2008	<u>\$10,597</u>	<u>\$11,352</u>

Costs incurred under service contracts during the three months ended March 31, 2009 and 2008, amounted to \$1.1 million and \$1.0 million, respectively, and are recognized as incurred.

Note 6. Comprehensive Loss

Comprehensive loss generally represents all changes in stockholders' equity except those resulting from investments or contributions by stockholders. The Company's unrealized gain (loss) on marketable investments represents the only component of other comprehensive loss that is excluded from net loss. The changes in components of comprehensive loss for the periods presented are as follows (in thousands):

	Three Months Ended March 31,	
	2009	2008
Net loss	\$(1,828)	\$ (542)
Unrealized loss on marketable and long term investments, net of tax	(117)	(1,642)
Comprehensive loss	<u>\$(1,945)</u>	<u>\$(2,184)</u>

[Table of Contents](#)

Note 7. Income Taxes

The interim effective income tax rate reflects applicable United States federal and state tax rates and the tax impact of foreign operations, reduced primarily by tax exempt interest income and research and development (R&D) tax. The interim effective income tax rate is based on management's best estimate of the annual effective income tax rate. The increase in the effective tax rate for the three months ended March 31, 2009, to 40% compared to 30% for the same period in 2008, was primarily attributable to the impact of deductible permanent items – such as tax exempt interest income and R&D tax credits – having a more pronounced impact on the Company's effective income tax rate in 2009, compared with 2008. This was partially offset by a reduction in rate due to the discrete effect of a change in California tax regulation being included in the first quarter of 2009.

On February 20, 2009, California Governor Arnold Schwarzenegger signed budget legislation that contains significant California tax law changes including tax-related economic incentives and tax increases. The enacted legislation includes an election to apply a single sales factor apportionment formula for most businesses starting in tax years beginning after January 1, 2011. As a result of the legislation, Cutera has revalued its California deferred tax assets expected to be realized after December 31, 2010, which resulted in additional income tax expense of approximately \$133,000 that has been recorded discretely during the first quarter of 2009.

Undistributed earnings of the Company's foreign subsidiaries of approximately \$2.1 million and \$1.8 million at March 31, 2009 and 2008, respectively, are considered to be indefinitely reinvested and, accordingly, no provision for federal and state income taxes has been provided thereon. Upon distribution of those earnings in the form of dividends or otherwise, the Company would be subject to both U.S. income taxes (subject to an adjustment for foreign tax credits) and withholding taxes payable to various foreign countries.

As of the end of the first quarter of 2009, there were no material changes to either the nature or the amounts of the uncertain tax positions previously determined and disclosed pursuant to FASB Interpretation No. 48 at the end of 2008.

Note 8. Commitments and Contingencies

Warranty Obligations

The Company provides standard one-year or two-year warranty coverage on its systems. Warranty coverage provided is for labor and parts necessary to repair the systems during the warranty period. The Company accounts for the estimated warranty cost of the standard warranty coverage as a charge to cost of revenue when revenue is recognized. The estimated warranty cost is based on historical product performance. Utilizing actual service records, the Company calculates the average service hours and parts expense per system and applies the actual labor and overhead rates to determine the estimated warranty charge. The Company updates these estimated charges every quarter.

The following table provides the changes in the product warranty accrual for the three months ended March 31, 2009 and 2008 (in thousands):

	March 31,	
	2009	2008
Balance at December 31, 2008 and 2007	\$1,916	\$ 2,725
Add: Accruals for warranties issued during the period	480	1,177
Less: Settlements made during the period	(791)	(1,598)
Balance at March 31, 2009 and 2008	<u>\$1,605</u>	<u>\$ 2,304</u>

Facility Leases

The Company leases its Brisbane, California, office and manufacturing facility under a non-cancelable operating lease which expires in 2013. In addition, the Company has leased office facilities in certain international countries, including: Japan, Switzerland, France, and Spain. As of March 31, 2009, the Company was committed to minimum lease payments for facilities and other leased assets under long-term non-cancelable operating leases as follows (in thousands):

<u>Year Ending December 31,</u>	
2009 (remainder)	\$1,100
2010	1,333
2011	1,324
2012	1,431
2013	1,544
Future minimum rental payments	<u>\$6,732</u>

Purchase Commitments

The Company maintains certain open inventory purchase commitments with its suppliers to ensure a smooth and continuous supply for key components. The Company's liability in these purchase commitments is generally restricted to a forecasted time-horizon as agreed between the parties. These forecasted time-horizons can vary among different suppliers. The Company's open inventory purchase commitments were not material at March 31, 2009.

Litigation

Two securities class action lawsuits were filed against the Company and two of the Company's executive officers in April 2007 and May 2007, respectively, in the U.S. District Court for the Northern District of California following declines in the Company's stock price. The plaintiffs claim to represent purchasers of

[Table of Contents](#)

the Company's common stock from January 31, 2007 through May 7, 2007. The complaints generally allege that materially false statements and omissions were made regarding the Company's financial prospects, and seek unspecified monetary damages. On November 1, 2007, the Court ordered the two cases consolidated. On December 17, 2007, the plaintiffs filed a consolidated, amended complaint, and on January 31, 2008, the Company filed a motion to dismiss that complaint. On September 30, 2008, in response to the Company's motion, the Court issued an order dismissing the plaintiffs' amended complaint without prejudice. On October 28, 2008, the plaintiffs filed a Notice Of Intention Not to File A Second Amended Consolidated Complaint. On November 25, 2008, the Court closed the case on its own initiative. On November 26, 2008, the plaintiffs filed a Notice of Appeal to the U.S. Court of Appeals for the Ninth Circuit, and on April 16, 2009, the plaintiffs filed their opening brief with that Court. The Company intends to continue to defend this case vigorously, regardless of the stage of litigation. Although the Company retains director and officer liability insurance, there is no assurance that such insurance will cover the claims that are made or will insure the Company fully for all losses on covered claims. Since the Company does not believe that a significant adverse result in this litigation is probable and since the amount of potential damages in the event of an adverse result is not reasonably estimable, no expense has been recorded with respect to the contingent liability associated with this matter.

A Telephone Consumer Protection Act, or TCPA, class action lawsuit was filed against the Company in January 2008 in the Illinois Circuit Court, Cook County, by Bridgeport Pain Control Center, Ltd., seeking monetary damages, injunctive relief, costs and other relief. The complaint alleges that the Company violated the TCPA by sending unsolicited advertisements by facsimile to the plaintiff and other recipients nationwide during the four-year period preceding the lawsuit without the prior express invitation or permission of the recipients. Two state law claims, limited to Illinois recipients, allege a class period of three and five years, respectively. Under the TCPA, recipients of unsolicited facsimile advertisements may be entitled to damages of \$500 per violation for inadvertent violations and \$1,500 per violation for knowing or willful violations. On February 22, 2008, the Company removed the case to federal court in the Northern District of Illinois. On April 22, 2009, following negotiations between the parties, the plaintiff confirmed in writing that, subject to Court approval and the signing of a definitive agreement, the parties have agreed to settle this lawsuit. We have included in our Condensed Consolidated Statement of Operations \$850,000 for the estimated cost of the tentative settlement, net of administrative expenses and amounts that are expected to be recoverable from our insurance carrier, of this litigation matter. If this lawsuit does not settle on the foregoing proposed terms, the Company intends to defend this case vigorously.

Other Legal Matters

In addition to the foregoing lawsuits, the Company is named from time to time as a party to product liability and other lawsuits in the normal course of its business. As of March 31, 2009, the Company is not a party to any other material pending litigation.

Indemnifications

In the normal course of business, the Company enters into agreements that contain a variety of representations, warranties, and indemnification obligations. For example, the Company has entered into indemnification agreements with each of its directors and executive officers. The Company's executive officers are named as defendants in securities class action litigation – see Litigation section above. The Company's exposure under its various indemnification obligations, including those under the indemnification agreements with its directors and executive officers, is unknown since the outcome of that securities litigation is unpredictable and the amount that could be payable thereunder is not reasonably estimable, and since other indemnification obligations involve future claims that may be made against the Company. The Company has not accrued or paid any amounts for any such indemnification obligations. However, the Company may record charges in the future as a result of these potential indemnification obligations, including those related to the securities class action litigation.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Caution Regarding Forward-Looking Statements

The following discussion should be read in conjunction with the attached financial statements and notes thereto, and with our audited financial statements and notes thereto for the fiscal year ended December 31, 2008 as contained in our annual report on Form 10-K filed with the SEC on March 16, 2009. This quarterly report, including the following sections, contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Throughout this report, and particularly in this Item 2, the forward-looking statements are based upon our current expectations, estimates and projections and reflect our beliefs and assumptions based upon information available to us at the date of this report. In some cases, you can identify these statements by words such as "may," "might," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue," and other similar terms. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties, and assumptions that are difficult to predict. Our actual results, performance or achievements could differ materially from those expressed or implied by the forward-looking statements. These forward-looking statements include, but are not limited to, statements relating to our future financial performance, the ability to grow our business, increase our revenue, manage expenses, generate additional cash, achieve and maintain profitability, develop and commercialize existing and new products and applications, and improve the performance of our worldwide sales and distribution network, and the outlook regarding long term prospects. These forward-looking statements involve risks and uncertainties. The cautionary statements set forth below and those contained in Part II, Item 1A – "Risk Factors" commencing on page 19, identify important factors that could cause actual results to differ materially from those predicted in any such forward-looking statements. We caution you to not place undue reliance on these forward-looking statements, which reflect management's analysis and expectations only as of the date of this report. We undertake no obligation to update forward-looking statements to reflect events or circumstances occurring after the date of this Form 10-Q.

Introduction

The Management's Discussion and Analysis, or MD&A, is organized as follows:

- *Executive Summary.* This section provides a general description and history of our business, a brief discussion of our product lines and the opportunities, trends, challenges and risks we focus on in the operation of our business.
- *Critical Accounting Policies and Estimates.* This section describes the key accounting policies that are affected by critical accounting estimates.
- *Recent Accounting Pronouncements.* This section describes the issuance and effect of new accounting pronouncements that may be applicable to us.
- *Results of Operations.* This section provides our analysis and outlook for the significant line items on our Consolidated Statements of Operations.
- *Liquidity and Capital Resources.* This section provides an analysis of our liquidity and cash flows, as well as a discussion of our commitments that existed as of March 31, 2009.

[Table of Contents](#)

Executive Summary

Company Description. We are a global medical device company engaged in the design, development, manufacture, marketing and servicing of laser and other light-based aesthetics systems for practitioners worldwide. We offer products on three platforms—CoolGlide, Xeo and Solera—for use by physicians and other qualified practitioners to allow our customers to offer safe and effective aesthetic treatments to their customers.

Our corporate headquarters and U.S. operations are located in Brisbane, California, from where we conduct our manufacturing, warehousing, research, regulatory, sales, service, marketing and administrative activities. In the United States, we market, sell and service our products primarily through direct sales and service employees and through a distribution relationship with PSS World Medical Shared Services, Inc., a wholly owned subsidiary of PSS World Medical, or PSS, which has over 700 sales representatives serving physician offices throughout the United States. In addition, we also sell certain items, like Titan hand piece refills and marketing brochures, through the internet.

International sales are generally made through direct sales employees and through a worldwide distributor network in over 30 countries. Outside the United States, we have a direct sales presence in Australia, Canada, France, Japan, Spain, Switzerland and the United Kingdom.

Products. Our revenue is derived from the sale of Products, Upgrades, Service and Titan hand piece refills. Product revenue represents the sale of a system, which consists of one or more hand pieces and a console that incorporates a universal graphic user interface, a laser and/or other light-based module, control system software and high voltage electronics. However, depending on the application, the laser or other light-based module is sometimes contained in the hand piece, such as with our Pearl and Pearl Fractional applications, instead of in the console. We offer our customers the ability to select the system that best fits their practice at the time of purchase and then to cost-effectively add applications to their system as their practice grows. This enables customers to upgrade their systems whenever they want and provides us with a source of recurring revenue, which we classify as Upgrade revenue. Service revenue relates to amortization of pre-paid service contract revenue and receipts for services on out-of-warranty products. Titan hand piece refill revenue is associated with our Titan hand piece which requires replacement of the optical source after a set number of pulses has been used.

Significant Business Trends. We believe that our ability to grow revenue has been, and will continue to be, primarily dependent on the following:

- Investments made in our global sales and marketing infrastructure.
- Continuing introduction of new aesthetic products and applications.
- Continuing customer demand for our products and consumer demand for the applications they offer.
- Marketing to physicians in the core dermatology and plastic surgeon specialties, as well as outside those specialties.
- Generating Service, Upgrade and Titan hand piece refill revenue from our growing installed base of customers.

Our U.S. revenue decreased 49% and our international revenue decreased 12% in the first quarter of 2009, compared to the first quarter of 2008. U.S. revenue decreased 22% and international revenue increased 25% in the first quarter of 2008 from the first quarter of 2007. We believe that the decline in U.S. and international revenue from the first quarter in 2008 to the first quarter in 2009, were primarily attributable to the global recession that is causing our prospective customers to delay their purchase decisions. We also believe that those prospects who do not have established medical offices are finding it more difficult to obtain credit financing. International revenue accounted for 56% of our total revenue for the three months ended March 31, 2009, compared with 43% in the same period in 2008.

Service revenue increased 20% to \$3.3 million for the first quarter of 2009, compared to the first quarter of 2008. Service contract amortization is the primary component of our total service revenue. Due to an increasing installed base of customers, our revenue from contract amortization has consistently increased. However, our deferred service revenue balance declined by \$1.1 million, to \$10.6 million as of March 31, 2009, compared to December 31, 2008. This decline was primarily attributable to: (i) a decrease in unit sales volume in the U.S. that historically included an element of deferred revenue for a service contract beyond our standard warranty terms; (ii) a reconfiguring of our service contract offering which resulted in a reduction of our average service contract pricing in the first quarter of 2009; and (iii) a shift by customers towards purchasing quarterly, rather than annual, service contracts. With the reconfiguring of our service contracts, we expect that in the long term our service amortization will decline, which will be offset by an increase in revenue derived from handpiece sales that were previously included in the service contract amortization.

Our gross margin decreased to 59% in the first quarter of 2009, compared to 62% in the first quarter of 2008. The decrease in gross margin in the first quarter of 2009, compared to the same period in 2008, was due primarily to lower revenue volume that reduced the leverage of our manufacturing and service department expenses, lower average selling prices of our products, partially offset by reduced expenses resulting from improved product reliability.

Our sales and marketing expenses as a percentage of net revenue increased to 49% in the first quarter of 2009, compared to 48% in the first quarter of 2008. In absolute dollars, sales and marketing expenses decreased by \$3.3 million to \$7.0 million in the first quarter of 2009, compared to same period in 2008. The decrease in total dollars in the first quarter of 2009, compared to the same period in 2008, was primarily caused by reduced personnel expenses in the United States due to lower sales commissions, resulting from lower revenue, and lower headcount.

Our research and development (R&D) expenses as a percentage of net revenue increased to 12% in the first quarter of 2009, compared to 8% in the first quarter of 2008. The increase in expenses as a percentage of net revenue was due primarily to lower revenue in the first quarter of 2009, compared to the same period in 2008. In absolute dollars, R&D expenses remained relatively flat in the first quarter of 2009, compared to the same period in 2008.

Our general and administrative (G&A) expenses as a percentage of net revenue increased to 17% in the first quarter of 2009, compared to 14% in the first quarter of 2008. The increase in expenses as a percentage of net revenue was due primarily to lower revenue in the first quarter of 2009, compared to the same period in 2008. In absolute dollars, G&A expenses decreased by \$421,000 to \$2.5 million in the first quarter of 2009, compared to the same period in 2008, due primarily to lower personnel and legal expenses.

[Table of Contents](#)

We are a defendant in a Telephone Consumer Protection Act class action lawsuit. See Part II, Item I – Legal Proceedings below. We have included in our Condensed Consolidated Statement of Operations \$850,000 for the estimated cost of the tentative settlement, net of administrative expenses and amounts that may be recoverable from our insurance carrier, of this litigation matter.

In response to the current economic environment, we reduced our company-wide workforce by approximately 12% in April, 2009. This reduction impacted all departments and functions. Due to the timing of this reduction in headcount, and because there are non-recurring charges associated with it, we expect our second quarter operating expenses to be similar to those in the first quarter of 2009. Starting from the third quarter of 2009, we expect our operating expenses to decline, compared to the first quarter of 2009, as we will experience the full impact of our cost cutting measures.

At March 31, 2009, we had recognized deferred tax assets of \$11.0 million relating to other temporary differences between the financial reporting and tax bases of assets and liabilities, and tax credit carryforwards. The weight given to the potential effect of negative and positive evidence is commensurate with the extent to which it can be objectively verified and judgment must be used in considering the relative impact of positive and negative evidence. We believe that it is more likely than not that we will be able to generate sufficient future taxable income to realize the carrying value of these deferred tax assets. We review the deferred tax asset and valuation allowance on a quarterly basis and consider whether positive and negative evidence exists to effect the realization of deferred tax assets. The weight given to the potential effect of negative and positive evidence is commensurate with the extent to which it can be objectively verified and judgment must be used in considering the relative impact of positive and negative evidence. Future changes in this evidence could have a significant impact of

Factors that May Impact Future Performance.

Our industry is impacted by numerous competitive, regulatory and other significant factors. Our industry is highly competitive and our future performance depends on our ability to compete successfully. Additionally, our future performance is dependent upon our ability to continue to develop new products and innovative technologies, obtain regulatory clearances for our products, protect the proprietary technology of our products and our manufacturing processes, manufacture our products cost effectively, and successfully market and distribute our products in a profitable manner. If we fail to execute on the aforementioned initiatives, our business would be adversely affected. A detailed discussion of these and other factors that could impact our future performance are provided in Part II, Item 1A “Risk Factors” section below.

Critical Accounting Policies and Estimates.

The preparation of our Condensed Consolidated Financial Statements and related disclosures in conformity with generally accepted accounting principles in the United States, or GAAP, requires us to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. These estimates, judgments and assumptions are based on historical experience and on various other factors that we believe are reasonable under the circumstances. We periodically review our estimates and make adjustments when facts and circumstances dictate. To the extent that there are material differences between these estimates and actual results, our financial condition or results of operations will be affected. Critical accounting estimates, as defined by the Securities and Exchange Commission (SEC), are those that are most important to the portrayal of our financial condition and results of operations and require our management’s most difficult and subjective judgments and estimates of matters that are inherently uncertain. The accounting policies that we consider to be critical, subjective, and requiring judgment in their application are summarized in “Item 7—Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our Annual Report on Form 10-K for the year ended December 31, 2008 filed with SEC on March 16, 2009. There have been no significant changes to the accounting policies and estimates disclosed in our Form 10-K.

Recent Accounting Pronouncements

For a full description of recent accounting pronouncements, including the respective expected dates of adoption and effects on results of operations and financial condition see Note 1 “Summary of Significant Accounting Policies – Recent Accounting Pronouncement” in the Notes to Condensed Consolidated Financial Statements in Part I, Item I of this Form 10-Q”.

Results of Operations

The following table sets forth selected consolidated financial data for the periods indicated, expressed as a percentage of net total revenue.

	Three Months Ended	
	2009	2008
Operating Ratio:		
Net revenue	100%	100%
Cost of revenue	41%	38%
Gross profit	59%	62%
Operating expenses:		
Sales and marketing	49%	48%
Research and development	12%	8%
General and administrative	17%	14%
Litigation settlement	6%	— %
Total operating expenses	84%	70%
Loss from operations	(25)%	(8)%
Interest and other income, net	4%	4%
Loss before income taxes	(21)%	(4)%
Benefit from income taxes	(8)%	(1)%
Net loss	(13)%	(3)%

[Table of Contents](#)

Net Revenue

(Dollars in thousands)	Three Months Ended March 31,		
	2009	% Change	2008
Revenue mix by geography:			
United States	\$ 6,345	(49)%	\$12,384
International	8,085	(12)%	9,234
Consolidated total revenue	<u>\$14,430</u>	<u>(33)%</u>	<u>\$21,618</u>
<i>United States as a percentage of total revenue</i>	44%		57%
<i>International as a percentage of total revenue</i>	56%		43%
Revenue mix by product category:			
Products	\$ 8,038	(48)%	\$15,327
Upgrades	1,754	(21)%	2,232
Service	3,253	20%	2,704
Titan hand piece refills	1,385	2%	1,355
Consolidated total revenue	<u>\$14,430</u>	<u>(33)%</u>	<u>\$21,618</u>

U.S. sales decreased 49% in the first quarter of 2009, compared to the same period in 2008. We believe the decrease in U.S. revenue in the first quarter of 2009 was primarily attributable to the continuing recession that is causing our prospective customers to delay their purchase decisions. We also believe that a segment of our business – those aesthetic practices that operate in settings that are not medical offices – are being particularly affected by the economic environment and may be finding it more difficult to obtain credit financing.

International sales decreased 12% in the first quarter of 2009, compared to the same period in 2008. We believe the decrease in international revenue in the first quarter of 2009 was primarily due to the global recession. International revenue as a percentage of total revenue increased to 56% in the first quarter of 2009, compared with 43% in the same period in 2008.

Product revenue decreased 48% and Upgrade revenue decreased 21% in the first quarter of 2009, compared to the same period in 2008. We believe the decrease in Product and Upgrade revenue in 2009 was primarily driven by prospective customers deferring their purchase decisions due to the current global recession.

Service revenue increased 20% to \$3.3 million in the first quarter of 2009, compared to the same period in 2008. Service contract amortization is the primary component of our total service revenue. Due to an increasing installed base of customers, our revenue from contract amortization has consistently increased.

Our Titan hand piece refill revenue remained relatively flat in the first quarter of 2009, compared to the same period in 2008.

Gross Profit

(Dollars in thousands)	Three Months Ended March 31,		
	2009	% Change	2008
Gross profit	\$8,494	(37)%	\$13,399
As a percentage of net revenue	59%		62%

Our cost of revenue consists primarily of material, labor, stock-based compensation, royalty expense, warranty and manufacturing overhead expenses. Gross margin as a percentage of net revenue was 59% in the first quarter of 2009, compared with 62% in the same period in 2008. We believe this decrease in gross margin in 2009, was primarily attributable to:

- Lower overall revenue, due to lower volume and lower average selling prices. This resulted in reduced leverage of our manufacturing and service department expenses and was dilutive to our gross margin percentage;
- Higher Service and Titan refill revenue, as a percentage of total revenue, which have a lower gross margin than our Product and Upgrade revenue categories; and
- Increased level of international distributor business, which has slightly lower gross margins than our direct business.

Sales and Marketing

(Dollars in thousands)	Three Months Ended March 31,		
	2009	% Change	2008
Sales and marketing	\$7,003	(32)%	\$10,349
As a percentage of net revenue	49%		48%

Sales and marketing expenses consist primarily of labor, stock-based compensation, expenses associated with customer-attended workshops and trade shows, and advertising. Sales and marketing expenses decreased \$3.3 million in the first quarter of 2009, compared to same period in 2008. This decrease was mainly attributable to lower personnel expenses for North America of \$2.0 million, resulting from lower sales commission expenses (resulting from lower revenue) and a reduction in headcount. Sales and marketing expenses as a percentage of net revenue increased slightly to 49% in the first quarter of 2009, compared with 48% in the first quarter of 2008, due primarily to lower revenue.

Research and Development

(Dollars in thousands)	Three Months Ended March 31,		
	2009	% Change	2008
Research and development	\$1,743	(2)%	\$1,785
As a percentage of net revenue	12%		8%

[Table of Contents](#)

Research and development expenses consist primarily of labor, stock-based compensation, clinical, regulatory and material costs. R&D expenses were relatively flat in the first quarter of 2009, compared to the same period in 2008. R&D expenses as a percentage of total revenue increased to 12% in the first quarter of 2009, compared with 8% in the same period in 2008, due primarily to lower revenue.

General and Administrative

(Dollars in thousands)	Three Months Ended March 31,		
	2009	% Change	2008
General and administrative	\$2,520	(14)%	\$2,941
As a percentage of net revenue	17%		14%

General and administrative expenses consist primarily of labor, stock-based compensation, legal fees, accounting, audit and tax consulting fees, and other general and administrative expenses. G&A expenses decreased \$421,000 in the first quarter of 2009, compared to same period in 2008. This decrease was primarily attributable to lower personnel and legal expenses of \$237,000. G&A expenses as a percentage of total revenue increased, to 17% in the first quarter of 2009, compared with 14% in the same period in 2008, due primarily to lower revenue.

Litigation Settlement

We are a defendant in a Telephone Consumer Protection Act class action lawsuit. See Part II, Item I – Legal Proceedings below. We have included in our Condensed Consolidated Statement of Operations \$850,000 for the estimated cost of the tentative settlement, net of administrative expenses and amounts that may be recoverable from our insurance carrier, of this litigation matter.

Interest and Other Income, Net

Interest and other income, net consist of the following:

(Dollars in thousands)	Three Months Ended March 31,		
	2009	% Change	2008
Interest income	\$ 484	(48)%	\$ 934
Other income (expense), net	115	NA	(33)
Total Interest and other income, net	\$ 599	(34)%	\$ 901

Interest income decreased 48% in the first quarter of 2009, compared to same period in 2008. The decrease in 2009 was due primarily to reduced tax-exempt interest yields resulting primarily from the Federal Reserve cutting interest rates. Our cash, cash equivalents, marketable investments and long-term investments measured and recognized at fair value were \$103.4 million at March 31, 2009 and \$104.5 million at March 31, 2008.

Benefit from Income Taxes

(Dollars in thousands)	Three Months Ended March 31,		
	2009	Change	2008
Loss before income taxes	\$(3,023)	\$(2,248)	\$(775)
Benefit from income taxes	(1,195)	(962)	(233)
Effective tax rate	40%		30%

The interim effective income tax rate reflects applicable United States federal and state tax rates and the tax impact of foreign operations, reduced primarily by tax exempt interest income and research and development (R&D) tax. The interim effective income tax rate is based on our best estimate of the annual effective income tax rate. The increase in the effective tax rate for the three months ended March 31, 2009, to 40% compared to 30% for the same period in 2008, was primarily attributable to the impact of deductible permanent items – such as tax exempt interest income and R&D tax credits – having a more pronounced impact on our effective income tax rate in 2009, compared with 2008. This was partially offset by a reduction in rate due to the discrete effect of a change in California tax regulation being included in the first quarter of 2009.

At March 31, 2009, we had recognized deferred tax assets of \$11.0 million relating to other temporary differences between the financial reporting and tax bases of assets and liabilities, and tax credit carryforwards. The weight given to the potential effect of negative and positive evidence is commensurate with the extent to which it can be objectively verified and judgment must be used in considering the relative impact of positive and negative evidence. We believe that it is more likely than not that we will be able to generate sufficient future taxable income to realize the carrying value of these deferred tax assets. We review the deferred tax asset and valuation allowance on a quarterly basis and consider whether positive and negative evidence exists to effect the realization of deferred tax assets. The weight given to the potential effect of negative and positive evidence is commensurate with the extent to which it can be objectively verified and judgment must be used in considering the relative impact of positive and negative evidence. Future changes in this evidence could have a significant impact of the realization of the deferred tax asset.

Liquidity and Capital Resources

Liquidity is the measurement of our ability to meet potential cash requirements, fund the planned expansion of our operations and acquire businesses. Our sources of cash include operations and stock option exercises. We actively manage our cash usage and investment of liquid cash to ensure the maintenance of sufficient funds to meet our daily needs. The majority of our cash and investments are held in U.S. banks and our foreign subsidiaries maintain a limited amount of cash in their local banks to cover their short-term operating expenses.

[Table of Contents](#)

Cash, Cash Equivalents and Marketable Investments Summary

The following table summarizes our cash and cash equivalents, marketable investments and long-term investments (in thousands):

	<u>March 31, 2009</u>	<u>December 31, 2008</u>	<u>Decrease</u>
Cash and cash equivalents	\$ 35,793	\$ 36,540	\$ (747)
Marketable investments	58,131	60,653	(2,522)
Long-term investments	9,463	9,627	(164)
Total	<u>\$ 103,387</u>	<u>\$ 106,820</u>	<u>\$(3,433)</u>

Cash Flows

(Dollars in thousands)	<u>Three Months Ended March 31,</u>	
	<u>2009</u>	<u>2008</u>
Net cash flow provided by (used in):		
Operating activities	\$ (2,980)	\$ (510)
Investing activities	2,119	27,531
Financing activities	114	35
Net increase (decrease) in cash and cash equivalents	<u>\$ (747)</u>	<u>\$ 27,056</u>

Cash Flows from Operating Activities

We used \$3.0 million of cash in operating activities for the first three months of 2009, which was primarily attributable to:

- \$290,000 used by the net loss of \$1.8 million after adjusting for non-cash related items of \$1.5 million consisting primarily of stock-based compensation expense of \$1.0 million and other items of \$493,000;
- \$1.1 million used due to a decrease in deferred revenue resulting primarily from a decrease in unit sales volume of Products and Upgrades in the U.S, a reduction in our service contract pricing in the first quarter of 2009, and a shift by customers towards purchasing shorter term contracts;
- \$882,000 used to increase other assets relating primarily to a higher tax receivable balance of \$1.1 million; and
- \$682,000 used to pay down the higher 2008 year-end accrued liabilities relating primarily to: (i) personnel expenses of \$583,000 (ii) reduction of accrued warranty expenses of \$311,000 due primarily to fewer units remaining under warranty, (iii) reduction of the income taxes payable balance by \$285,000, and (iv) net reduction of \$213,000 of accrued royalties due to the reduced revenue in the first quarter of 2009. This was partially offset by higher accrued legal settlement expense of \$850,000.

We used \$510,000 of cash in operating activities for the first three months of 2008, which was primarily attributable to:

- \$3.1 million used to pay down the higher year-end accrued liabilities relating primarily to (i) personnel expenses of \$1.2 million, (ii) \$991,000 of the 2007 year-end income tax liability, (iii) reduction in accrued warranty costs by \$421,000 due primarily to fewer units remaining under warranty, and (iv) a net decrease in accrued patent royalties by \$302,000 due to the pay down of the higher liability from the fourth quarter of 2007; and
- \$1.9 million cash used as a result of the increase in inventories due to the lower than expected revenue in the first quarter of 2008; offset by
- \$2.3 million cash generated from the collection of the higher accounts receivable balance as of December 31, 2007;
- \$788,000 of cash generated due to an increase in deferred revenue resulting primarily from higher service contract revenue; and
- \$1.1 million generated from the net loss of \$542,000 after adjusting for non-cash related items primarily consisting of \$1.3 million of stock-based compensation and \$223,000 of depreciation and amortization.

Cash Flows from Investing Activities

We generated net cash of \$2.1 million from investing activities in the first three months of 2009, which was primarily attributable to:

- \$7.7 million in net proceeds from the sales and maturities of marketable investments; partially offset by
- \$5.5 million of cash used to purchase marketable investments.

We generated net cash of \$27.5 million from investing activities in the first three months of 2008, which was primarily attributable to:

- \$39.9 million in net proceeds from the sales and maturities of marketable investments due to an attempt to reduce our exposure to the auction rate and variable rate demand note markets during the quarter; partially offset by
- \$12.2 million of cash used to purchase marketable investments; and
- \$186,000 cash used to purchase property and equipment primarily for the research and development function.

Cash Flows from Financing Activities

Net cash provided by financing activities in the first three months of 2009 was \$114,000, which resulted from cash generated by the issuance of stock through our stock option.

[Table of Contents](#)

Net cash provided by financing activities in the first three months of 2008 was \$35,000, which was from the proceeds from the issuance of stock through our stock option.

Adequacy of cash resources to meet future needs

We had cash, cash equivalents and marketable investments of \$103.4 million as of March 31, 2009. Of this amount, we had \$9.5 million invested in student loan auction rate securities that were rated AAA to Aa3 by a major credit rating agency and are either commercially insured or guaranteed by The Federal Family Education Loan Program (FFELP) or The Maine Educational Loan Authority (MELA). These securities were classified under the caption of “Long-term investments” in the Condensed Consolidated Balance Sheet as auctions for these securities have been failing since February 2008 due to the current overall credit concerns in capital markets. Upon an auction failure, the interest rates do not reset at a market rate but instead reset based on a formula contained in the security prospectus, which rate is generally higher than the current market rate. The failure of the auctions impacts our ability to readily liquidate our ARS into cash until a future auction of these investments is successful or the auction rate security is refinanced by the issuer into another type of debt instrument. Based on our ability to access our cash, cash equivalents and other short term marketable investments and our expected operating cash flows, we do not anticipate the current lack of liquidity on these investments will affect our ability to operate our business as usual over the next twelve months.

Off-Balance Sheet Arrangements

We do not participate in transactions that generate relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance, variable interest or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As of March 31, 2008, we were not involved in any unconsolidated transactions.

Contractual Obligations

We believe that there were no significant changes during the first three months of 2009 in our payments due under contractual obligations, as disclosed in our Annual Report on Form 10-K for the year ended December 31, 2008.

Contingencies

We are party to various legal proceedings. See Note 8, “Commitments and Contingencies,” in the Notes to Condensed Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q for more information.

Indemnifications

In the normal course of business, we enter into agreements that contain a variety of representations, warranties, and indemnification obligations. For example, we have entered into indemnification agreements with each of our directors and executive officers. Our executive officers are named as defendants in securities class action litigation – See Part II, Item 2 – Legal Proceedings. Our exposure under the various indemnification obligations, including those under the indemnification agreements with our directors and officers, is unknown since the outcome of the securities litigation is unpredictable and the amount that could be payable thereunder is not reasonably estimable, and since other indemnification obligations involve future claims that may be made against us. We have not accrued or paid any amounts for any such indemnification obligations. However, we may record charges in the future as a result of these potential indemnification obligations, including those related to the securities class action litigation.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Sensitivity

Our exposure to interest rate risk relates primarily to our investment portfolio. Fixed rate securities may have their fair market value adversely impacted due to fluctuations in interest rates, while floating rate securities may produce less income than expected if interest rates fall. Due in part to these factors, our future investment income may fall short of expectation due to changes in interest rates or we may suffer losses in principal if forced to sell securities which have declined in market value due to changes in interest rates. The primary objective of our investment activities is to preserve principal while at the same time maximizing yields without significantly increasing risk. To achieve this objective, we invest in debt instruments of the U.S. Government and its agencies and municipal bonds, and, by policy, restrict our exposure to any single type of investment or issuer by imposing concentration limits. To minimize the exposure due to adverse shifts in interest rates, we maintain investments at a weighted average maturity (interest reset date for ARS) of generally less than eighteen months. Assuming a hypothetical increase in interest rates of one percentage point, the fair value of our total investment portfolio would have potentially declined by approximately \$422,000 as of March 31, 2009.

We hold interest bearing ARS that represent investments in pools of student loans issued by either the Federal Family Education Loan Program or the Maine Education Loan Authority. At the time of acquisition, these ARS investments were intended to provide liquidity via an auction process that resets the applicable interest rate at predetermined calendar intervals, allowing investors to either roll over their holdings or gain immediate liquidity by selling such interests at par. Since February 2008, uncertainties in the credit markets affected all of our holdings in ARS investments and auctions for our investments in these securities have continued to fail. Consequently, the investments are not currently liquid and we will not be able to access these funds until a future auction of these investments is successful, a buyer is found outside of the auction process or the ARS is refinanced by the issuer into another type of debt instrument. Maturity dates for these ARS investments range from 2028 to 2043. We currently classify all of these investments as long-term investments in our Condensed Consolidated Balance Sheet because of our continuing inability to determine when these investments will settle. We have also modified our current investment strategy and increased our investments in more liquid money market investments, United States Treasury securities, municipal bonds, and eliminated investments in corporate debt. The valuation of our ARS investment portfolio is subject to uncertainties that are difficult to predict. Factors that may impact its valuation include, duration of time that the ARS remain illiquid, changes to credit ratings of the securities, rates of default of the underlying assets, changes in the underlying collateral value, market discount rates for similar illiquid investments, ongoing strength and quality of credit markets. If the current market conditions deteriorate further, we may be required to record additional other-than-temporary impairment charges in future quarters.

[Table of Contents](#)

Foreign Currency Exchange Risk

We have international subsidiaries and operations and are, therefore, subject to foreign currency rate exposure. Although the majority of our revenue and purchases are denominated in U.S. dollars, we have revenue to certain international customers and expenses denominated in the Japanese Yen, Euro, Pounds Sterling, Australian Dollars, Swiss Francs and Canadian Dollars. The net gains and losses from the revaluation of foreign denominated assets and liabilities was a loss of \$33,000 for the quarter ended March 31, 2009 and is included in operating loss in our Condensed Consolidated Statements of Operations. Movements in currency exchange rates could cause variability in our revenues, expenses or interest and other income (expense). Though to date our exposure to exchange rate volatility has not been significant, we cannot assure that there will not be a material impact in the future. Future fluctuations in the value of the U.S. dollar may affect the price competitiveness of our products. We do not believe, however, that we currently have significant direct foreign currency exchange rate risk and have not hedged exposures denominated in foreign currencies.

We do not utilize derivative financial instruments, derivative commodity instruments or other market risk sensitive instruments.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Attached as exhibits to this Quarterly Report are certifications of the Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), which are required in accordance with Rule 13a-14 of the Securities Exchange Act of 1934, as amended (Exchange Act). This Controls and Procedures section includes the information concerning the controls evaluation referred to in the certifications, and it should be read in conjunction with the certifications for a more complete understanding of the topics presented.

The Company conducted an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in the Rules 13a-15(e) and 15d-15(e) under the Exchange Act) (Disclosure Controls) as of the end of the period covered by this Report required by Exchange Act Rules 13a-15(b) or 15d-15(b). The controls evaluation was conducted under the supervision and with the participation of the Company's management, including the CEO and CFO. Based on this evaluation, the CEO and our CFO have concluded that as of the end of the period covered by this report the Company's disclosure controls and procedures were effective at a reasonable assurance level.

Definition of Disclosure Controls

Disclosure Controls are controls and procedures designed to reasonably assure that information required to be disclosed in the Company's reports filed under the Exchange Act, such as this Report, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure Controls are also designed to reasonably assure that such information is accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure. The Company's Disclosure Controls include components of its internal control over financial reporting, which consists of control processes designed to provide reasonable assurance regarding the reliability of its financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles in the U.S. To the extent that components of the Company's internal control over financial reporting are included within its Disclosure Controls, they are included in the scope of the Company's annual controls evaluation.

Limitations on the Effectiveness of Controls

The Company's management, including the CEO and CFO, does not expect that the Company's disclosure controls or internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Two securities class action lawsuits were filed against the Company and two of the Company's executive officers in April 2007 and May 2007, respectively, in the U.S. District Court for the Northern District of California following declines in the Company's stock price. The plaintiffs claim to represent purchasers of the Company's common stock from January 31, 2007 through May 7, 2007. The complaints generally allege that materially false statements and omissions were made regarding the Company's financial prospects, and seek unspecified monetary damages. On November 1, 2007, the Court ordered the two cases consolidated. On December 17, 2007, the plaintiffs filed a consolidated, amended complaint, and on January 31, 2008, the Company filed a motion to dismiss that complaint. On September 30, 2008, in response to the Company's motion, the Court issued an order dismissing the plaintiffs' amended complaint without prejudice. On October 28, 2008, the plaintiffs filed a Notice Of Intention Not to File A Second Amended Consolidated Complaint. On November 25, 2008, the Court closed the case on its own initiative. On November 26, 2008, the plaintiffs filed a Notice of Appeal to the U.S. Court of Appeals for the Ninth Circuit, and on April 16, 2009, the plaintiffs filed their opening brief with that Court. The Company intends to continue to defend this case vigorously, regardless of the stage of litigation. Although the Company retains director and officer liability insurance, there is no assurance that such insurance will cover the claims that are made or will insure the Company fully for all losses on covered claims. Since the Company does not believe that a significant adverse result in this litigation is probable and since the amount of potential damages in the event of an adverse result is not reasonably estimable, no expense has been recorded with respect to the contingent liability associated with this matter.

[Table of Contents](#)

A Telephone Consumer Protection Act, or TCPA, class action lawsuit was filed against the Company in January 2008 in the Illinois Circuit Court, Cook County, by Bridgeport Pain Control Center, Ltd., seeking monetary damages, injunctive relief, costs and other relief. The complaint alleges that the Company violated the TCPA by sending unsolicited advertisements by facsimile to the plaintiff and other recipients nationwide during the four-year period preceding the lawsuit without the prior express invitation or permission of the recipients. Two state law claims, limited to Illinois recipients, allege a class period of three and five years, respectively. Under the TCPA, recipients of unsolicited facsimile advertisements may be entitled to damages of \$500 per violation for inadvertent violations and \$1,500 per violation for knowing or willful violations. On February 22, 2008, the Company removed the case to federal court in the Northern District of Illinois. On April 22, 2009, following negotiations between the parties, the plaintiff confirmed in writing that, subject to Court approval and the signing of a definitive agreement, the parties have agreed to settle this lawsuit. We have included in our Condensed Consolidated Statement of Operations \$850,000 for the estimated cost of the tentative settlement, net of administrative expenses and amounts that are expected to be recoverable from our insurance carrier, of this litigation matter. If this lawsuit does not settle on the foregoing proposed terms, the Company intends to defend this case vigorously.

ITEM 1A. RISK FACTORS

We are in a difficult economic period, and the uncertainty in the economy may reduce customer demand for our products, cause potential customers to delay their purchase decisions and make it more difficult for some potential customers to obtain credit financing, all of which would adversely affect our business and may increase the volatility of our stock price.

Current economic conditions are unstable and we are in a global recession. The general economic difficulties being experienced by our customers and the lack of availability of consumer credit for some of our customers are adversely affecting the market in which we operate. In times of economic uncertainty or recession, individuals often reduce the amount of money that they spend on discretionary items, including aesthetic procedures. This economic uncertainty may cause potential customers to delay their capital equipment purchase decisions, and may make it more difficult for some potential customers to obtain credit financing necessary to purchase our products or make timely payments to us, each of which can have a material adverse effect on our revenue, profitability and business and may increase the volatility of our stock price.

We rely heavily on our sales professionals to market and sell our products worldwide. If we are unable to effectively train, retain and manage these employees, our ability to manage our business will be harmed, which would impair our future revenue and profitability.

Our success largely depends on our ability to manage and improve the productivity levels of our sales professionals worldwide. Measures we implement in an effort to improve that productivity may not be successful. For example, in January 2009 and April 2009 we had a company-wide reduction of employees, including members of our direct sales force. Further, we restructured our sales commission program, and assigned some sales employees with new sales or management responsibilities. These measures may not improve productivity and may lead to reduced revenue and employee turnover, which could materially harm our business. If we experience significant levels of attrition or reductions in productivity among our sales professionals or our sales managers, our revenue and profitability may be adversely affected as a result.

The initiatives that we are implementing in an effort to improve revenue and profitability could be unsuccessful, which could harm our business.

In the three months ended March 31, 2009, compared to the same period in 2008, our revenue decreased 33%, U.S. sales decreased 49% and international sales decreased 12%. In an effort to improve our revenue and profitability, we have implemented several strategic initiatives focusing on our worldwide sales and marketing infrastructure, product introductions and expense management. For example, we had company-wide reductions in force in January 2009 and April 2009 resulting in a net reduction of approximately 22% of our workforce from December 31, 2008, and we reduced or eliminated certain employee benefit programs. These initiatives are intended to improve our revenue and profitability; however, they may instead result in employee turnover, instability to our operations and cause harm to our business.

A lack of customer demand for our products in any of our markets would harm our revenue.

Most of our products are marketed to established dermatology and plastic surgeon medical offices, as well as the non-core businesses, such as family practitioners, primary care physicians, gynecologists, and non-medical models. Our most recent product introductions, Pearl and Pearl Fractional, are targeted at dermatologists and plastic surgeons. Continuing to achieve and maintain penetration into each of our markets is a material assumption of our business strategy.

Demand for our products in any of our markets could be weakened by several factors, including:

- The duration of the current worldwide recession;
- Current lack of credit financing for some of our potential customers;
- Poor financial performance of market segments that try introducing aesthetic procedures to their businesses;
- The inability to differentiate our products from those of our competitors;
- Reduced patient demand for elective aesthetic procedures;
- Failure to build and maintain relationships with opinion leaders within the various market segments; and
- An increase in malpractice lawsuits.

[Table of Contents](#)

If we do not achieve anticipated demand for our products in each of our market segments, our revenue may be adversely impacted.

To successfully market and sell our products internationally, we must address many issues that are unique to our international business.

Our international revenue was \$8.1 million for the three months ended March 31, 2009, which represented 56% of our total revenue. International revenue is a material component of our business strategy. We depend on third-party distributors and a direct sales force to sell our products internationally, and if they underperform we may be unable to increase or maintain our level of international revenue. To grow our business, we will need to improve productivity in current sales territories and expand into new territories. However, direct sales productivity may not improve and distributors may not accept our business or commit the necessary resources to market and sell our products to the level of our expectations. As a result, we may not be able to increase or maintain international revenue growth.

We believe that an increasing amount of our future revenue will come from international sales as we expand our overseas operations and develop opportunities in additional international territories. International sales are subject to a number of risks, including:

- Difficulties in staffing and managing our foreign operations;
- Export restrictions, trade regulations and foreign tax laws;
- Fluctuating foreign currency exchange rates;
- Foreign certification and regulatory requirements;
- Lengthy payment cycles and difficulty in collecting accounts receivable;
- Customs clearance and shipping delays;
- Political and economic instability;
- Lack of awareness of our brand in international markets;
- Preference for locally-produced products; and
- Reduced protection for intellectual property rights in some countries.

If one or more of these risks were realized, it could require us to dedicate significant resources to remedy the situation; and if we were unsuccessful at finding a solution, we may not be able to sell our products in a particular market and, as a result, our revenue may decline.

We compete against companies that have longer operating histories, newer and different products, and greater resources, each of which may result in a competitive disadvantage to us and harm our business.

Our industry is subject to intense competition. Our products compete against similar products offered by public companies, such as Candela, Cynosure, Elen (in Italy), Iridex, Palomar, Solta, and Syneron and as well as private companies such as Aesthera, Alma, Lumenis, Sciton and several other companies. We are likely to compete with new companies in the future. Competition with these companies could result in reduced selling prices, reduced profit margins and loss of market share, any of which would harm our business, financial condition and results of operations. We also face competition from medical products, such as Botox, an injectable compound used to reduce wrinkles, and collagen injections. Other alternatives to the use of our products include sclerotherapy, a procedure involving the injection of a solution into the vein to collapse it, electrolysis, a procedure involving the application of electric current to eliminate hair follicles, and chemical peels. We may also face competition from manufacturers of pharmaceutical and other products that have not yet been developed. Our ability to compete effectively depends upon our ability to distinguish our company and our products from our competitors and their products, and includes such factors as:

- Success and timing of new product development and introductions;
- Product performance;
- Product pricing;
- Quality of customer support;

[Table of Contents](#)

- Development of successful distribution channels, both domestically and internationally; and
- Intellectual property protection.

Some of our competitors have newer or different products and more established customer relationships than we do, which could inhibit our market penetration efforts. For example, we have encountered, and expect to continue to encounter, situations where, due to pre-existing relationships, potential customers decided to purchase additional products from our competitors. Potential customers also may need to recoup the cost of products that they have already purchased from our competitors and may decide not to purchase our products, or to delay such purchases. If we are unable to achieve continued market penetration, we will be unable to compete effectively and our business will be harmed.

In addition, some of our current and potential competitors have greater financial, research and development, business development, manufacturing, and sales and marketing resources than we have. Our competitors could utilize their greater financial resources to acquire other companies to gain enhanced name recognition and market share, as well as new technologies or products that could effectively compete with our existing product lines. For example, Thermage acquired Reliant in December 2008 and thereby formed Solta. To compete effectively, we have to demonstrate that our products are attractive alternatives to other devices and treatments by differentiating our products on the basis of such factors as performance, brand name, service and price, and this is difficult to do in a crowded market. Our competitors could form strategic alliances with other companies to develop products and solutions that effectively compete with our products. For example, Palomar and Syneron have each entered into agreements with Proctor and Gamble for the proposed development of home-use aesthetic devices. Business combinations and alliances by our competitors could increase competition, which could harm our business.

The aesthetic equipment market is characterized by rapid innovation. To compete effectively, we must develop and acquire new products, market them successfully, and identify new markets for our technology.

We have created products to apply our technology to hair removal, treatment of veins and skin rejuvenation, including the treating of diffuse redness, skin laxity, fine lines, wrinkles, skin texture, pore size and pigmented lesions. Currently, these applications represent the majority of offered laser and other energy-based aesthetic procedures. To grow in the future, we must develop and acquire new and innovative aesthetic applications, identify new markets for our existing technologies, and develop and acquire new technologies for various platforms. To successfully expand our product offerings, we must, among other things:

- Develop and acquire new products that either add to or significantly improve our current products;
- Convince our customers and prospects that our new products or upgrades would be an attractive revenue-generating addition to their practices;
- Sell our products to a broad customer base;
- Identify new markets and alternative applications for our technology;
- Protect our existing and future products with defensible intellectual property; and
- Satisfy and maintain all regulatory requirements for commercialization.

Every year since 2000, we have introduced at least one new product. Historically, these introductions have generally been a significant component of our financial performance. Our business strategy is based, in part, on our expectation that we will continue to make regular product introductions that we can sell to new customers as systems and to existing customers as upgrades to their existing systems. However, even with a significant investment in research and development, we may be unable to continue to develop, acquire or effectively launch and market new products and technologies regularly, or at all, which could adversely affect our business.

In addition, our former Executive Vice President of Research & Development, who is also one of our founders, resigned from his employment with us effective March 2009 to pursue personal interests. Although we have appointed a new head of that department, his experience and leadership was critical to our historical product development initiatives. As a result, we may not be able to continue our trend of regular new product introductions. Also, we may need additional research and development resources to make product introductions, which may be more costly and time consuming to our organization.

Some of our competitors release new products more often and more successfully than we do. For example, in the second half of 2008, revenue from sales of our new Pearl Fractional product to new and existing customers did not meet our expectations. We believe that, to increase revenue from sales of new products and related upgrades, we need to continue to develop our clinical support, further expand and nurture relationships with industry thought leaders and increase market awareness of the benefits of our new products. If we fail to successfully commercialize any of our new products, our business could be harmed.

While we attempt to protect our products through patents and other intellectual property, there are few barriers to entry that would prevent new entrants or existing competitors from developing products that compete directly with ours. For example, while our CoolGlide product was the first long-pulse Nd:YAG, or long wavelength, laser system cleared by the FDA for permanent hair reduction on all skin types, competitors have subsequently introduced systems that utilize Nd:YAG lasers, and received FDA clearances to market these products as treating all skin types. We expect that any competitive advantage we may enjoy from other current and future innovations, such as combining multiple hand pieces in a single system to perform a variety of applications, may diminish over time, as companies successfully respond to our, or create their own, innovations. Consequently, we believe that we will have to continuously innovate and improve our products and technology to compete successfully. If we are unable to innovate successfully, our products could become obsolete and our revenue could decline as our customers and prospects purchase our competitors' products.

[Table of Contents](#)

If there is not sufficient consumer demand for the procedures performed with our products, practitioner demand for our products could be inhibited, resulting in unfavorable operating results and reduced growth potential.

Continued expansion of the global market for laser and other energy-based aesthetic procedures is a material assumption of our business strategy. Most procedures performed using our products are elective procedures not reimbursable through government or private health insurance, with the costs borne by the patient. The decision to utilize our products may therefore be influenced by a number of factors, including:

- Consumer disposable income and access to consumer credit, which as a result of the current recession, have been significantly impacted;
- The cost of procedures performed using our products;
- The cost, safety and effectiveness of alternative treatments, including treatments which are not based upon laser or other energy-based technologies and treatments which use pharmaceutical products;
- The success of our sales and marketing efforts; and
- The education of our customers and patients on the benefits and uses of our products, compared to competitors' products and technologies.

If, as a result of these factors, there is not sufficient demand for the procedures performed with our products, practitioner demand for our products could be reduced, which could have a material adverse effect on our business, financial condition, revenue and result of operations.

If PSS World Medical fails to perform to our expectations, we may fail to achieve anticipated operating results.

We have a distribution agreement with PSS World Medical. PSS sales professionals work in coordination with our sales force to locate new customers for our products throughout the United States. Revenue from PSS declined in 2008, compared with 2007, and represented approximately 14% of our worldwide revenue in both 2008 and 2007. Although we have dedicated sales professionals to work closely with, and increase the focus and attention on, our PSS relationship, there is no assurance that the focus on PSS will translate into increased revenue for us. Further, if PSS does not perform adequately under the arrangement, or terminates our relationship, it may have a material adverse effect on our business, financial condition and results of operations.

We depend on skilled and experienced personnel to operate our business effectively. If we are unable to recruit, hire and retain these employees, our ability to manage and expand our business will be harmed, which would impair our future revenue and profitability.

Our success largely depends on the skills, experience and efforts of our officers and other key employees. Except for Change of Control and Severance Agreements for our executive officers, we do not have employment contracts with any of our officers or other key employees. Any of our officers and other key employees may terminate their employment at any time. We do not have a succession plan in place for each of our officers and key employees. In addition, we do not maintain "key person" life insurance policies covering any of our employees. The loss of any of our senior management team members could weaken our management expertise and harm our business.

Our ability to retain our skilled labor force and our success in attracting and hiring new skilled employees are critical factors in determining whether we will be successful in the future. We may not be able to meet our future hiring needs or retain existing personnel. We may face particularly significant challenges and risks in hiring, training, managing and retaining engineering and sales and marketing employees. Failure to attract and retain personnel, particularly technical and sales and marketing personnel, would materially harm our ability to compete effectively and grow our business.

We may incur substantial expenses if our practices are shown to have violated the Telephone Consumer Protection Act, and defending ourselves against the related litigation could distract management and harm our business.

A class action lawsuit was filed against us in January 2008 alleging violations under the federal Telephone Consumer Protection Act and related Illinois state laws. On April 22, 2009, following negotiations between the parties, the plaintiff confirmed in writing that, subject to Court approval and the signing of a definitive agreement, the parties have agreed to settle this lawsuit upon payment by the Company of \$850,000, net of administrative costs and any amount recoverable from the Company's insurance relating to this proposed settlement. Unless those contingencies have been satisfied, there are no assurances that this lawsuit will settle on these proposed terms, or on any terms. If this lawsuit does not settle, then it may cause us to incur additional significant expenses, consume resources and continue to divert the attention of our management from our business operations. Each of these factors could harm our business.

Two securities class action lawsuits were filed against us in April and May 2007, respectively, based upon the decreases in our stock price following the announcement of our preliminary first quarter 2007 revenue and earnings, and the announcement of our revised 2007 guidance. Defending ourselves against this litigation could distract management and harm our business.

Two class action lawsuits were filed against us following declines in our stock price in the spring of 2007. On November 1, 2007, the court ordered the two cases consolidated. These consolidated cases have been on appeal since November 2008 after our motion to dismiss the plaintiffs' complaint was granted. Although we retain director and officer liability insurance, there can be no guarantee that such insurance will cover the claims that are made or will insure us fully for all losses on covered claims. This litigation may distract our management and consume resources that would otherwise have been directed toward operating our business. Each of these factors could harm our business.

We are exposed to fluctuations in the market values of our portfolio of investments, specifically auction rate securities (ARS), and due to interest rates changes. Due to failed auctions of our auction rate investments since February 2008, we are unable to readily liquidate our ARS into cash, and in 2008, we took impairment charges. If these auctions continue to fail and the market value of our ARS declines further, we may have to take additional impairment charges, which could reduce future earnings, harm our business and cause our stock price to decline.

We invest our excess cash primarily in money market funds and in highly liquid debt instruments of the U.S. government and its agencies, U.S. municipalities (including ARS). As of March 31, 2009, our balance in marketable securities was \$67.6 million. The longer the duration of a security, the more susceptible it is

[Table of Contents](#)

to changes in market interest rates and bond yields. As yields increase, those securities with a lower yield-at-cost show a mark-to-market unrealized loss. For example, assuming a hypothetical increase in interest rates of one percentage point, the fair value of our total investment portfolio as of March 31, 2009 would have potentially decreased by approximately \$422,000, resulting in an unrealized loss that would subsequently adversely impact our earnings. As a result, changes in the market interest rates will affect our future net income (loss).

Our marketable securities included \$9.5 million of ARS, which are classified under the caption of “Long-term investments” in the Condensed Consolidated Balance Sheets. These ARS are designed to provide liquidity via an auction process that resets the applicable interest rate at predetermined calendar intervals, generally every 35 days—though auctions for some of the securities are held every 360 days. However, since February 2008, auctions for each of our investments in ARS have failed due to the current overall credit concerns in capital markets. Upon an auction failure, the interest rates do not reset at a market rate but instead reset based on a formula contained in the security, which rate is generally higher than the current market rate. The failure of the auctions impacts our ability to readily liquidate our ARS into cash until a future auction of these investments is successful, a buyer is found outside of the auction process or the ARS is refinanced by the issuer into another type of debt instrument.

In 2008, we recorded other-than-temporary impairment charges of \$3.6 million relating to our ARS investments. If in the future we are unable to liquidate our investments in ARS, or there are further other-than-temporary impairments in their market value, we may have to take additional charges, which could reduce our future earnings, harm our business and cause our stock price to decline.

The price of our common stock may fluctuate substantially. We have a limited number of shares of common stock outstanding, a large portion of which is held by a small number of investors, which could result in the increase in volatility of our stock price.

As of December 31, 2008, approximately 63% of our outstanding shares of common stock were held by 10 institutional investors. As a result of our relatively small public float, our common stock may be less liquid than the stock of companies with broader public ownership. Among other things, trading of a relatively small volume of our common stock may have a greater impact on the trading price for our shares than would be the case if our public float were larger.

In 2008, the global equities market declined sharply and our industry was adversely affected. The public market price of our common stock has in the past fluctuated substantially and, due to the current concentration of stockholders and the continuing global recession, may continue to do so in the future. The market price for our common stock could also be affected by a number of other factors, including:

- The duration of the current global economic recession, and other general market conditions unrelated to our operating performance;
- Sales of large blocks of our common stock, including sales by our executive officers, directors and our large institutional investors;
- Quarterly variations in our, or our competitors', results of operations;
- Changes in analysts' estimates, investors' perceptions, recommendations by securities analysts or our failure to achieve analysts' estimates;
- The announcement of new products or service enhancements by us or our competitors;
- The announcement of the departure of a key employee or executive officer;
- Regulatory developments or delays concerning our, or our competitors' products; and
- The initiation of litigation by us or against us.

Actual or perceived instability in our stock price could reduce demand from potential buyers of our stock, thereby causing our stock price to either remain depressed or to decline further.

We may be involved in future costly intellectual property litigation, which could impact our future business and financial performance.

Our competitors or other patent holders may assert that our present or future products and the methods we employ are covered by their patents. In addition, we do not know whether our competitors own or will obtain patents that they may claim prevent, limit or interfere with our ability to make, use, sell or import our products. Although we may seek to resolve any potential future claims or actions, we may not be able to do so on reasonable terms, or at all. If, following a successful third-party action for infringement, we cannot obtain a license or redesign our products, we may have to stop manufacturing and selling the applicable products and our business would suffer as a result. In addition, a court could require us to pay substantial damages, and prohibit us from using technologies essential to our products, any of which would have a material adverse effect on our business, results of operations and financial condition.

We may become involved in litigation not only as a result of alleged infringement of a third party's intellectual property rights but also to protect our own intellectual property. For example, we have been, and may hereafter become, involved in litigation to protect the trademark rights associated with our company name or the names of our products. Infringement and other intellectual property claims, with or without merit, can be expensive and time-consuming to litigate, and could divert management's attention from our core business.

Intellectual property rights may not provide adequate protection for some or all of our products, which may permit third parties to compete against us more effectively.

We rely on patent, copyright, trade secret and trademark laws and confidentiality agreements to protect our technology and products. At March 31, 2009, we had eleven issued U.S. patents. Some of our components, such as our laser module, electronic control system and high-voltage electronics, are not, and in the

[Table of Contents](#)

future may not be, protected by patents. Additionally, our patent applications may not issue as patents or, if issued, may not issue in a form that will be advantageous to us. Any patents we obtain may be challenged, invalidated or legally circumvented by third parties. Consequently, competitors could market products and use manufacturing processes that are substantially similar to, or superior to, ours. We may not be able to prevent the unauthorized disclosure or use of our technical knowledge or other trade secrets by consultants, vendors, former employees or current employees, despite the existence generally of confidentiality agreements and other contractual restrictions. Monitoring unauthorized uses and disclosures of our intellectual property is difficult, and we do not know whether the steps we have taken to protect our intellectual property will be effective. Moreover, the laws of many foreign countries will not protect our intellectual property rights to the same extent as the laws of the United States.

The absence of complete intellectual property protection exposes us to a greater risk of direct competition. Competitors could purchase one of our products and attempt to replicate some or all of the competitive advantages we derive from our development efforts, design around our protected technology, or develop their own competitive technologies that fall outside of our intellectual property rights. If our intellectual property is not adequately protected against competitors' products and methods, our competitive position and our business could be adversely affected.

If we fail to obtain or maintain necessary FDA clearances for our products and indications, if clearances for future products and indications are delayed or not issued, if there are federal or state level regulatory changes or if we are found to have violated applicable FDA marketing rules, our commercial operations would be harmed.

Our products are medical devices that are subject to extensive regulation in the United States by the FDA for manufacturing, labeling, sale, promotion, distribution and shipping. Before a new medical device, or a new use of or labeling claim for an existing product, can be marketed in the United States, it must first receive either 510(k) clearance or pre-marketing approval from the FDA, unless an exemption applies. Either process can be expensive and lengthy. In the event that we do not obtain FDA clearances or approvals for our products, our ability to market and sell them in the United States and revenue derived there from may be adversely affected.

Medical devices may be marketed in the United States only for the indications for which they are approved or cleared by the FDA. For example, we have FDA clearance to market our Titan product in the United States only for deep dermal heating, and are therefore prevented from promoting or advertising Titan in the United States for any other indications. If we fail to comply with these regulations, it could result in enforcement action by the FDA which could lead to such consequences as warning letters, adverse publicity, criminal enforcement action and/or third-party civil litigation, each of which could adversely affect us.

We have obtained 510(k) clearance for the indications for which we market our products. However, our clearances can be revoked if safety or effectiveness problems develop. We also are subject to Medical Device Reporting regulations, which require us to report to the FDA if our products cause or contribute to a death or serious injury, or malfunction in a way that would likely cause or contribute to a death or serious injury. Our products are also subject to state regulations, which are, in many instances, in flux. Changes in state regulations may impede sales. For example, federal regulations allow our products to be sold to, or on the order of, "licensed practitioners," as determined on a state-by-state basis. As a result, in some states, non-physicians may legally purchase our products. However, a state could change its regulations at any time, thereby disallowing sales to particular types of end users. We cannot predict the impact or effect of future legislation or regulations at the federal or state levels.

The FDA and state authorities have broad enforcement powers. If we fail to comply with applicable regulatory requirements, it could result in enforcement action by the FDA or state agencies, which may include any of the following sanctions:

- Warning letters, fines, injunctions, consent decrees and civil penalties;
- Repair, replacement, recall or seizure of our products;
- Operating restrictions or partial suspension or total shutdown of production;
- Refusing our requests for 510(k) clearance or pre-market approval of new products, new intended uses, or modifications to existing products;
- Withdrawing 510(k) clearance or pre-market approvals that have already been granted; and
- Criminal prosecution. If any of these events were to occur, it could harm our business.

If we fail to comply with the FDA's Quality System Regulation and laser performance standards, our manufacturing operations could be halted, and our business would suffer.

We are currently required to demonstrate and maintain compliance with the FDA's Quality System Regulation, or QSR. The QSR is a complex regulatory scheme that covers the methods and documentation of the design, testing, control, manufacturing, labeling, quality assurance, packaging, storage and shipping of our products. Because our products involve the use of lasers, our products also are covered by a performance standard for lasers set forth in FDA regulations. The laser performance standard imposes specific record-keeping, reporting, product testing and product labeling requirements. These requirements include affixing warning labels to laser products, as well as incorporating certain safety features in the design of laser products. The FDA enforces the QSR and laser performance standards through periodic unannounced inspections. Our failure to take satisfactory corrective action in response to an adverse QSR inspection or our failure to comply with applicable laser performance standards could result in enforcement actions, including a public warning letter, a shutdown of our manufacturing operations, a recall of our products, civil or criminal penalties, or other sanctions, such as those described in the preceding paragraph, which would cause our sales and business to suffer.

[Table of Contents](#)

If we modify one of our FDA-approved devices, we may need to seek re-approval, which, if not granted, would prevent us from selling our modified products or cause us to redesign our products.

Any modifications to an FDA-cleared device that would significantly affect its safety or effectiveness or that would constitute a major change in its intended use would require a new 510(k) clearance or possibly a pre-market approval. We may not be able to obtain additional 510(k) clearance or pre-market approvals for new products or for modifications to, or additional indications for, our existing products in a timely fashion, or at all. Delays in obtaining future clearance would adversely affect our ability to introduce new or enhanced products in a timely manner, which in turn would harm our revenue and future profitability.

We have made modifications to our devices in the past and may make additional modifications in the future that we believe do not or will not require additional clearance or approvals. If the FDA disagrees, and requires new clearances or approvals for the modifications, we may be required to recall and to stop marketing the modified devices, which could harm our operating results and require us to redesign our products.

We may be unable to obtain or maintain international regulatory qualifications or approvals for our current or future products and indications, which could harm our business.

Sales of our products outside the United States are subject to foreign regulatory requirements that vary widely from country to country. In addition, exports of medical devices from the United States are regulated by the FDA. Complying with international regulatory requirements can be an expensive and time-consuming process and approval is not certain. The time required to obtain clearance or approvals, if required by other countries, may be longer than that required for FDA clearance or approvals, and requirements for such clearances or approvals may significantly differ from FDA requirements. We may be unable to obtain or maintain regulatory qualifications, clearances or approvals in other countries. We may also incur significant costs in attempting to obtain and in maintaining foreign regulatory approvals or qualifications. If we experience delays in receiving necessary qualifications, clearances or approvals to market our products outside the United States, or if we fail to receive those qualifications, clearances or approvals, we may be unable to market our products or enhancements in international markets effectively, or at all, which could have a material adverse effect on our business and growth strategy.

Any acquisitions that we make could disrupt our business and harm our financial condition.

We expect to evaluate potential strategic acquisitions of complementary businesses, products or technologies. We may also consider joint ventures and other collaborative projects. We may not be able to identify appropriate acquisition candidates or strategic partners, or successfully negotiate, finance or integrate any businesses, products or technologies that we acquire. Furthermore, the integration of any acquisition and management of any collaborative project may divert management's time and resources from our core business and disrupt our operations and we may incur significant legal, accounting and banking fees in connection with such a transaction. In addition, if we purchase a company that is not profitable, our cash balances may be reduced or depleted. We do not have any experience as a team with acquiring companies or products. If we decide to expand our product offerings beyond laser and other energy-based products, we may spend time and money on projects that do not increase our revenue. Any cash acquisition we pursue would diminish our available cash balances to us for other uses, and any stock acquisition could be dilutive to our stockholders.

While we from time to time evaluate potential collaborative projects and acquisitions of businesses, products and technologies, and anticipate continuing to make these evaluations, we have no present understandings, commitments or agreements with respect to any material acquisitions or collaborative projects.

The expense and potential unavailability of insurance coverage for our customers could adversely affect our ability to sell our products, and therefore our financial condition.

Some of our customers and prospective customers have had difficulty in procuring or maintaining liability insurance to cover their operation and use of our products. Medical malpractice carriers are withdrawing coverage in certain states or substantially increasing premiums. If this trend continues or worsens, our customers may discontinue using our products and potential customers may opt against purchasing laser and other energy based products due to the cost or inability to procure insurance coverage. The unavailability of insurance coverage for our customers and prospects could adversely affect our ability to sell our products, and that could harm our financial condition.

Because we do not require training for users of our products, and sell our products at times to non-physicians, there exists an increased potential for misuse of our products, which could harm our reputation and our business.

Federal regulations allow us to sell our products to or on the order of "licensed practitioners." The definition of "licensed practitioners" varies from state to state. As a result, our products may be purchased or operated by physicians with varying levels of training, and in many states, by non-physicians, including nurse practitioners, chiropractors and technicians. Outside the United States, many jurisdictions do not require specific qualifications or training for purchasers or operators of our products. We do not supervise the procedures performed with our products, nor do we require that direct medical supervision occur. We and our distributors generally offer but do not require product training to the purchasers or operators of our products. In addition, we sometimes sell our systems to companies that rent our systems to third parties and that provide a technician to perform the procedures. The lack of training and the purchase and use of our products by non-physicians may result in product misuse and adverse treatment outcomes, which could harm our reputation and our business, and, in the event these result in product liability litigation, distract management and subject us to liability, including legal expenses.

Product liability suits could be brought against us due to a defective design, material or workmanship or misuse of our products and could result in expensive and time-consuming litigation, payment of substantial damages and an increase in our insurance rates.

If our products are defectively designed, manufactured or labeled, contain defective components or are misused, we may become subject to substantial and costly litigation by our customers or their patients. Misusing our products or failing to adhere to operating guidelines could cause significant eye and skin damage, and underlying tissue damage. In addition, if our operating guidelines are found to be inadequate, we may be subject to liability. We have been involved, and may in the future be involved, in litigation related to the use of our products. Product liability claims could divert management's attention from our core business, be expensive to defend and result in sizable damage awards against us. We may not have sufficient insurance coverage for all future claims. We may not be able to obtain insurance in amounts or scope sufficient to provide us with adequate coverage against all potential liabilities. Any product liability claims brought against us, with or without merit, could increase our product liability insurance rates or prevent us from securing continuing coverage, could harm our reputation in the industry and could reduce product sales. In addition, we have been experiencing steep increases in our product liability insurance premiums. If our premiums continue to rise, we may no longer be able to afford adequate insurance coverage.

If we are unable to maintain adequate insurance coverage, or we have product liability claims in excess of our insurance coverage, claims would be paid out of cash reserves, thereby harming our financial condition, operating results and profitability.

[Table of Contents](#)

Our manufacturing operations are dependent upon third-party suppliers, making us vulnerable to supply shortages and price fluctuations, which could harm our business.

Many of the components and materials that comprise our products are currently manufactured by a limited number of suppliers. A supply interruption or an increase in demand beyond our current suppliers' capabilities could harm our ability to manufacture our products until a new source of supply is identified and qualified. Our reliance on these suppliers subjects us to a number of risks that could harm our business, including:

- Interruption of supply resulting from modifications to or discontinuation of a supplier's operations;
- Delays in product shipments resulting from uncorrected defects, reliability issues or a supplier's variation in a component;
- A lack of long term supply arrangements for key components with our suppliers;
- Inability to obtain adequate supply in a timely manner, or on reasonable terms;
- Difficulty locating and qualifying alternative suppliers for our components in a timely manner;
- Production delays related to the evaluation and testing of products from alternative suppliers and corresponding regulatory qualifications; and
- Delay in supplier deliveries.

Any interruption in the supply of components or materials, or our inability to obtain substitute components or materials from alternate sources at acceptable prices in a timely manner, could impair our ability to meet the demand of our customers, which would have an adverse effect on our business.

Any defects in the design, material or workmanship of our products may not be discovered prior to shipment to customers, which could result in warranty obligations that may reduce our future revenue and increase our cost.

The design of our products is complex. To manufacture them successfully, we must procure quality components and employ individuals with a significant degree of technical expertise. If our designs are defective, if suppliers fail to deliver components to specification, or if our employees fail to properly assemble, test and package our products, the reliability and performance of our products will be compromised.

If our products contain defects that cannot be repaired easily and inexpensively, we may experience:

- Loss of customer orders and delay in order fulfillment;
- Damage to our brand reputation;
- Increased cost of our warranty program due to product repair or replacement;
- Inability to attract new customers;
- Diversion of resources from our manufacturing and research and development departments into our service department; and
- Legal action.

The occurrence of any one or more of the foregoing could materially harm our business.

We forecast sales to determine requirements for components and materials used in our products and if our forecasts are incorrect, we may experience either delays in shipments or increased inventory costs.

We keep limited materials and components on hand. To manage our manufacturing operations with our suppliers, we forecast anticipated product orders and material requirements to predict our inventory needs up to twelve months in advance and enter into purchase orders on the basis of these requirements. Our experience of materials usage may not provide us with enough data to accurately predict future demand. If our sales demand decreases significantly, or if we overestimate our component and material requirements, we will have excess inventories and incur costs associated with the termination of existing purchase order obligations, which would increase our expenses. If our business expands, or if we underestimate our component and material requirements, we may have inadequate inventories, which could interrupt, delay or prevent delivery of our products to our customers. Any of these occurrences would negatively affect our financial performance and the level of satisfaction our customers have with our business.

Our gross and operating margins may vary over time.

Our gross and operating margins may be adversely affected by a number of factors, including decreases in our shipment volume, reductions in, or obsolescence of, our inventory, shifts in our product mix and increased expenses associated with repairing defective products covered by our warranty program. In addition, the competitive market environment in which we operate may adversely affect pricing for our products. Because we own most of our manufacturing capacity, a significant portion of our operating costs are fixed. If we experience a decrease in shipment volume, or have to reduce our pricing to remain competitive, or experience a greater than expected failure rate for any of our products, our gross and operating margins will be adversely impacted.

[Table of Contents](#)

We offer payment terms for qualified customers, In the event that there is a default by any of these customers, this could affect our earnings and could result in an increase in our days sales outstanding.

While we qualify customers to whom we offer payment terms, we cannot assure that the financial positions of these customers will not change adversely before we receive payment. In the event that there is a default by any of our customers to whom we have provided payment terms, this could affect our earnings and could result in an increase in our days sales outstanding.

We are subject to fluctuations in the exchange rate of the U.S. dollar and foreign currencies.

As a result of recent fluctuations in currency markets and the strong dollar relative to many other major currencies, our products priced in U.S. dollars may be more expensive relative to products of our foreign competitors, which could result in lower sales. We do not actively hedge our exposure to currency rate fluctuations. While we transact business primarily in U.S. Dollars, and a significant proportion of our revenue is denominated in U.S. Dollars, a portion of our costs and revenue is denominated in other currencies, such as the Euro, Japanese Yen, Australian Dollar, Canadian Dollar and British Pound Sterling. As a result, changes in the exchange rates of these currencies to the U.S. Dollar will affect our net income (loss).

We may have exposure to additional tax liabilities which could negatively impact our income tax provision, net income and cash flow.

We are subject to income taxes and other taxes in both the U.S. and the foreign jurisdictions in which we currently operate or have historically operated. The determination of our worldwide provision for income taxes and current and deferred tax assets and liabilities requires judgment and estimation. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. We are subject to regular review and audit by both domestic and foreign tax authorities as well as subject to the prospective and retrospective effects of changing tax regulations and legislation. Although we believe our tax estimates are reasonable, the ultimate tax outcome may materially differ from the tax amounts recorded in our consolidated financial statements and may materially affect our income tax provision, net income, and cash flows in the period in which such determination is made.

Anti-takeover provisions in our Amended and Restated Certificate of Incorporation and Bylaws, and Delaware law, contain provisions that could discourage a takeover.

Our Amended and Restated Certificate of Incorporation and Bylaws, and Delaware law, contain provisions that might enable our management to resist a takeover, and might make it more difficult for an investor to acquire a substantial block of our common stock. These provisions include:

- A classified board of directors;
- Advance notice requirements to stockholders for matters to be brought at stockholder meetings;
- A supermajority stockholder vote requirement for amending certain provisions of our Amended and Restated Certificate of Incorporation and Bylaws;
- Limitations on stockholder actions by written consent; and
- The right to issue preferred stock without stockholder approval, which could be used to dilute the stock ownership of a potential hostile acquirer.

These provisions, as well as Change of Control and Severance Agreements entered into with each of our executive officers, might discourage, delay or prevent a change in control of our company or a change in our management. The existence of these provisions could adversely affect the voting power of holders of common stock and limit the price that investors might be willing to pay in the future for shares of our common stock.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

We did not sell any equity securities during the period covered by this report.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 5. OTHER INFORMATION

None.

(1) Incorporated by reference from our Registration Statement on Form S-1 (Registration No. 333-111928) which was declared effective on March 30, 2004.

(2) Incorporated by reference from our Annual Report on Form 10-K filed with the SEC on March 25, 2005.

(3) Incorporated by reference from our Definitive Proxy Statement on Form 14A filed with the SEC on April 28, 2008.

SIGNATURE

Pursuant to the requirements of Section 13 or 15(d) of The Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized, in the city of Brisbane, State of California, on the 4th day of May, 2009.

CUTERA, INC.

/S/ RONALD J. SANTILLI

Ronald J. Santilli
Executive Vice President and Chief Financial Officer
(Principal Financial and Accounting Officer)

Certification of Chief Executive Officer**Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002**

I, Kevin P. Connors, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Cutera, Inc.:
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth quarter in the case of an annual report) that has materially affected or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's Registered Public Accounting Firm and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Kevin P. Connors
President, Chief Executive Officer and Director
(Principal Executive Officer)

I, Ronald J. Santilli, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that

(i) the accompanying Quarterly Report on Form 10-Q of the Company for the quarterly period ended March 31, 2009 (the "Report") fully complies with the requirements of Section 13(a) or Section 15(d), as applicable, of the Securities Exchange Act of 1934, as amended; and

(ii) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Date: May 4, 2009

/S/ RONALD J. SANTILLI

Ronald J. Santilli
Executive Vice President and Chief Financial Officer
(Principal Financial and Accounting Officer)

This certification accompanies this Report pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and shall not be deemed filed by the Company for purposes of Section 18 of the Securities and Exchange Act of 1934, as amended.
